

ReUse and Como Recycling Center guidelines and procedures

The purpose of this document is to ensure uniformity and understanding of ReUse and Como recycling policies and procedures

- All vehicles must have a tare weight (If a vehicle is coming onto campus fully loaded, dropping new items and taking old items for ReUse or Como, the tare weight can be captured after unloading. Whatever is most convenient for the movers)
- Vehicle must weigh in at Como before unloading at ReUse. All weight information needs to be given to Patti in the scale house at Como.
- All old items should be brought to the ReUse center. Most items will be unloaded at ReUse and sorted there.
- For large loads, whether recyclable or for disposal, they may be sent directly to Como.
 - This decision will be made by the ReUse staff. If items are being dropped directly at Como by direction of ReUse, Patti in the scale house will tell the driver where to drop items at the Como facility.
- An EFS number needs to be sent to Patti at Como - pstorm@umn.edu - [612-625-6481](tel:612-625-6481)
- Unload at Door #4 (immediately next to the roll off dumpster at ReUse)
